PREFACE	xi
CHAPTER 0 PRELIMINARIES	
0.0 Introduction	1
0.1 Reading mathematics	1
0.2 Quantifiers and negation	4
0.3 Set theory	6
0.4 Functions	9
0.5 Real numbers	17
0.6 Infinite sets	22
0.7 Complex numbers	25
CHAPTER 1 VECTORS, MATRICES, AND DERIVATIVES	
1.0 Introduction	32
1.1 Introducing the actors: points and vectors	33
1.2 Introducing the actors: matrices	42
1.3 Matrix multiplication as a linear transformation	56
1.4 The geometry of \mathbb{R}^n	67
1.5 Limits and continuity	84
1.6 Four big theorems	106
1.7 Derivatives in several variables as linear transformations	120
1.8 Rules for computing derivatives	140
1.9 The mean value theorem and criteria for differentiability	148
1.10 Review exercises for chapter 1	155
CHAPTER 2 SOLVING EQUATIONS	
2.0 Introduction	161
2.1 The main algorithm: row reduction	162
2.2 Solving equations with row reduction	168
2.3 Matrix inverses and elementary matrices	177
2.4 Linear combinations, span, and linear independence	182
2.5 Kernels, images, and the dimension formula	195
2.6 Abstract vector spaces	211
2.7 Eigenvectors and eigenvalues	222
2.8 Newton's method	232
2.9 Superconvergence	253
2.10 The inverse and implicit function theorems	259
2.11 Review exercises for chapter 2	278

CHAPTER 3 MANIFOLDS, TAYLOR POLYNOMIALS, QUADRATIC FORMS, AND CURVATURE	
3.0	Introduction 284
3.1	Manifolds 285
3.2	Tangent spaces 306
3.3	Taylor polynomials in several variables 314
3.4	Rules for computing Taylor polynomials 326
3.5	Quadratic forms 334
3.6	Classifying critical points of functions 344
3.7	Constrained critical points and Lagrange multipliers 351
3.8	Geometry of curves and surfaces 371
3.9	Review exercises for chapter 3 389
CHAPTER 4 INTEGRATION	
4.0	Introduction 393
4.1	Defining the integral 394
4.2	Probability and centers of gravity 409
4.3	What functions can be integrated? 423
4.4	Measure zero 430
4.5	Fubini's theorem and iterated integrals 438
4.6	Numerical methods of integration 450
4.7	Other pavings 461
4.8	Determinants 463
4.9	Volumes and determinants 478
4.10	The change of variables formula 485
4.11	Lebesgue integrals 497
4.12	Review exercises for chapter 4 516
CHAPTER 5 VOLUMES OF MANIFOLDS	
5.0	Introduction 520
5.1	Parallelograms and their volumes 521
5.2	Parametrizations 524
5.3	Computing volumes of manifolds 532
5.4	Integration and curvature 544
5.5	Fractals and fractional dimension 554
5.6	Review exercises for chapter 5 556
CHAPTER 6 FORMS AND VECTOR CALCULUS	
6.0	Introduction 558
6.1	Forms on \mathbb{R}^n 559
6.2	Integrating form fields over parametrized domains 572
6.3	Orientation of manifolds 576
6.4	Integrating forms over oriented manifolds 584

6.5	Forms in the language of vector calculus	594
6.6	Boundary orientation	606
6.7	The exterior derivative	620
6.8	Grad, curl, div, and all that	627
6.9	The generalized Stokes's theorem	635
6.10	The integral theorems of vector calculus	643
6.11	Electromagnetism	654
6.12	Potentials	667
6.13	Review exercises for chapter 6	678
APPENDIX: ANALYSIS		
A.0	Introduction	683
A.1	Arithmetic of real numbers	683
A.2	Cubic and quartic equations	687
A.3	Two results in topology: nested compact sets and Heine-Borel	692
A.4	Proof of the chain rule	693
A.5	Proof of Kantorovich's theorem	696
A.6	Proof of lemma 2.9.5 (superconvergence)	702
A.7	Proof of differentiability of the inverse function	704
A.8	Proof of the implicit function theorem	708
A.9	Proving the equality of crossed partials	711
A.10	Functions with many vanishing partial derivatives	712
A.11	Proving rules for Taylor polynomials; big O and little o	715
A.12	Taylor's theorem with remainder	720
A.13	Proving theorem 3.5.3 (completing squares)	725
A.14	Classifying constrained critical points	726
A.15	Geometry of curves and surfaces: proofs	730
A.16	Stirling's formula and proof of the central limit theorem	735
A.17	Proving Fubini's theorem	740
A.18	Justifying the use of other pavings	742
A.19	Results concerning the determinant	745
A.20	Change of variables formula: a rigorous proof	750
A.21	Justifying volume 0	756
A.22	Lebesgue measure and proofs for Lebesgue integrals	758
A.23	Justifying the change of parametrization	776
A.24	Computing the exterior derivative	781
A.25	The pullback	785
A.26	Proving Stokes's theorem	790
