<b>PREFACE</b>	xi
<b>CHAPTER 0 Preliminaries</b>	
0.0 Introduction	1
0.1 Reading mathematics	1
0.2 Quantifiers and negation	4
0.3 Set theory	6
0.4 Functions	9
0.5 Real numbers	17
0.6 Infinite sets	22
0.7 Complex numbers	25
<b>CHAPTER 1 Vectors, matrices, and derivatives</b>	
1.0 Introduction	32
1.1 Introducing the actors: points and vectors	33
1.2 Introducing the actors: matrices	42
1.3 A matrix as a transformation	56
1.4 The geometry of $\mathbb{R}^n$	67
1.5 Limits and continuity	84
1.6 Four big theorems	106
1.7 Derivatives in several variables as linear transformations	120
1.8 Rules for computing derivatives	140
1.9 Mean value theorem and criteria for differentiability	148
1.10 Review exercises for chapter 1	155
<b>CHAPTER 2 Solving equations</b>	
2.0 Introduction	161
2.1 The main algorithm: row reduction	162
2.2 Solving equations with row reduction	168
2.3 Matrix inverses and elementary matrices	177
2.4 Linear combinations, span, and linear independence	182
2.5 Kernels, images, and the dimension formula	195
2.6 Abstract vector spaces	211
2.7 Eigenvectors and eigenvalues	222
2.8 Newton's method	232

2.9	Superconvergence	252
2.10	The inverse and implicit function theorems	259
2.11	Review exercises for chapter 2	278
<b>CHAPTER 3 Manifolds, Taylor polynomials, quadratic forms, and curvature</b>		
3.0	Introduction	283
3.1	Manifolds	284
3.2	Tangent spaces	306
3.3	Taylor polynomials in several variables	314
3.4	Rules for computing Taylor polynomials	326
3.5	Quadratic forms	334
3.6	Classifying critical points of functions	343
3.7	Constrained critical points and Lagrange multipliers	350
3.8	Geometry of curves and surfaces	368
3.9	Review exercises for chapter 3	386
<b>CHAPTER 4 Integration</b>		
4.0	Introduction	391
4.1	Defining the integral	392
4.2	Probability and centers of gravity	407
4.3	What functions can be integrated?	421
4.4	Measure zero	428
4.5	Fubini's theorem and iterated integrals	436
4.6	Numerical methods of integration	448
4.7	Other pavings	459
4.8	Determinants	461
4.9	Volumes and determinants	476
4.10	The change of variables formula	483
4.11	Lebesgue integrals	495
4.12	Review exercises for chapter 4	514
<b>CHAPTER 5 Volumes of manifolds</b>		
5.0	Introduction	518
5.1	Parallelograms and their volumes	519
5.2	Parametrizations	523
5.3	Computing volumes of manifolds	531
5.4	Integration and curvature	543
5.5	Fractals and fractional dimension	546
5.6	Review exercises for chapter 5	548
<b>CHAPTER 6 Forms and vector calculus</b>		
6.0	Introduction	550

6.1	Forms on $\mathbb{R}^n$	551
6.2	Integrating form fields over parametrized domains	566
6.3	Orientation of manifolds	571
6.4	Integrating forms over oriented manifolds	582
6.5	Forms in the language of vector calculus	593
6.6	Boundary orientation	605
6.7	The exterior derivative	618
6.8	Grad, curl, div, and all that	625
6.9	Electromagnetism	634
6.10	The generalized Stokes's theorem	648
6.11	The integral theorems of vector calculus	655
6.12	Potentials	664
6.13	Review exercises for chapter 6	670
<b>APPENDIX: Analysis</b>		
A.0	Introduction	673
A.1	Arithmetic of real numbers	673
A.2	Cubic and quartic equations	677
A.3	Two results in topology: nested compact sets and Heine-Borel	682
A.4	Proof of the chain rule	683
A.5	Proof of Kantorovich's theorem	686
A.6	Proof of lemma 2.9.5 (superconvergence)	692
A.7	Proof of differentiability of the inverse function	694
A.8	Proof of the implicit function theorem	697
A.9	Proof of theorem 3.3.9: equality of crossed partials	700
A.10	Functions with many vanishing partial derivatives	702
A.11	Proving rules for Taylor polynomials; big $O$ and little $o$	705
A.12	Taylor's theorem with remainder	710
A.13	Proof of theorem 3.5.3 (completing squares)	714
A.14	Geometry of curves and surfaces: proofs	716
A.15	Stirling's formula and proof of the central limit theorem	721
A.16	Proof of Fubini's theorem	725
A.17	Justifying the use of other pavings	729
A.18	Results concerning the determinant	731
A.19	Change of variables formula: a rigorous proof	736
A.20	Justifying volume 0	743
A.21	Lebesgue measure and proofs for Lebesgue integrals	745
A.22	Justifying the change of parametrization	763
A.23	Computing the exterior derivative	766
A.24	The pullback	770
A.25	Proof of Stokes' theorem	775
